Abstract
Objective: To consider the stage of implementation of main competences and EPHO skills in selected schools of public health in four European countries—France, Poland, Portugal, and the UK.

Methods: By use of visual analogue scales (VAS) ranging 1–5, the leads of three schools of public health (SPH) in each of the four countries, France, Poland, Portugal and

for shaping a coherent public health profession, and thus ultimately for population health. This pilot report should be followed up by more systematically generating and comprehensive analyses to identify met and unmet needs in public health education and training.
