

On behalf of the Organizing Committee, I have the honor to invite you to participate in the International Conference **The impact of cultural complexity on the response on the pandemic**, which will take place in Pine Club, in Warsaw on May 10/12, 2023.

The main objective of the conference is to present the current results of scientific research and the state of knowledge on the impact of cultural differences on the spread of the COVID-19 pandemic.

The conference is organized more than 2 years after the start of the COVID-19 pandemic, and therefore will be an excellent opportunity to analyze what culture plays a role in determining the membership of the disease, how it helps in searching for behaviors and paths and readiness of the societies to comply with measures to prevent the spread of the pandemic.

The understanding of the disease as a pathophysiological process is diverse among patients culturally diverse. It depends mainly on cultural and environmental conditions. Understanding the disease is influenced by its cause, symptoms, expected medical assistance and how the disease affects the life of the patient.

I hope that the International Conference the impact of cultural complexity on the response on the pandemic will be an excellent opportunity to broaden knowledge in the field of medical sciences, health sciences, safety sciences, management sciences and will allow to propose new solutions in the prevention of epidemiological threats.

In addition to the plenary speeches, the agenda includes a discussion panel on developing a model solution for the fight against the pandemic, so that in possible subsequent special situations, a solution is prepared to apply.

#### *THEMATIC PANELS (proposal)*

##### Thematic area I - Medical sciences, health sciences:

- ✓ how Health care has changed in the COVID-19 pandemic - lessons for the future.
- ✓ effectiveness of COVID-19 laboratory diagnosis.
- ✓ Rehabilitation after COVID-19 needs and their implementation
- ✓ how public health has changed in the COVID-19 pandemic - what else we need to improve.
- ✓ what conclusions will we draw from the COVID-19 vaccination campaign for vaccinology.

##### Thematic area II - Management and quality sciences:

- ✓ Remote work and employee competences - managerial, technical, personal, legal aspects.
- ✓ the impact of the crisis on the behavior of enterprises, change of business models and their innovation.
- ✓ vaccination against COVID-19 as a challenge to human rights.
- ✓ the economic and social consequences of the COVID-19 pandemic.
- ✓ Covidocentrism as a threat to other social, economic and political problems.

Subject Area III - Safety studies:

- ✓ Organisational and personnel security related to the COVID-19 pandemic.
- ✓ activities of entities in the state security system.
- ✓ the role, consequences and compliance with sanitary and epidemiological restrictions.
- ✓ fighting the epidemic as a social, political and economic challenge.
- ✓ how the EU early warning system works on the example of the Covid19 pandemic.

I would like the conference to become a great place to establish cooperation that brings tangible benefits.

I cordially invite you to take part in this event.

*Yours Sincerely,*

*Project Manager DNK/SP/546298/2022  
Associate Professor Karolina J. Helnarska*
