# Strategic Plan (2018-2023)

## Mission

The ESPUM is interdisciplinary, French speaking, and committed to bettering society and the world; the School improves the health of populations through teaching, creation, and application of knowledge across the entire spectrum of public health.

## Vision

To be at the forefront of public health.

## 5 values

Humanism, Equity, Collaboration, Innovation, Excellence

# 5 strategic orientations:

1

Position ESPUM at the core of action and innovation in public health innovation

2

Offer cutting-edge public health training that is adapted to societal needs

3

Stimulate the advancement and dissemination of public health knowledge

4

Improve organizational performance

5

Create a stimulating, harmonious, and health promoting environment

Comprendre  
et agir  
pour la santé  
du monde
