

Tomasz Bochenek MD, MPH, PhD, is Deputy Director of the Institute of Public Health of the Jagiellonian University in Krakow, Poland and Assistant Professor at the Department of Drug Management therein. His professional interests include public health, pharmaceutical policy, pricing and reimbursement of medicines and medical devices, as well as utilization of health technology assessment for funding health care services. He has been teaching in area of public health for more than 20 years, being also active in developing new programs, coordinating such activities and liaising teaching with practical placements for students. He leads a task force aiming to promote public health and educational activities of the Institute, and to promote and develop future professional careers of the students. He has been actively involved in development and coordination of international educational projects and initiatives, including the EUROPUBHEALTH (European Public Health Master) programme. For many years he worked in public administration, as director of departments responsible for reimbursement of medicines and medical devices at regional Sickness Fund and branch of the National Health Fund. He also worked as an expert to the Minister of Health (including the Taskforce for Drug Management and the Economic Commission, negotiating prices and conditions for reimbursement of medicines, medical devices and foodstuffs for special dietary purposes), the Agency for Health Technology Assessment and Tariff System, and many other institutions in Poland and abroad. He is Chair of research network COST Action CA 15105 (Medicines Shortages), member of Scientific Council of the quarterly journal of the Polish State Medicines Agency, member of the Editorial Board of PLOS ONE, member of Piperska Group – Rational Prescribing, associated researcher of the South American Institute of Government in Health (ISAGS-UNASUR). Educated in Poland, the USA, Belgium, the UK, the Netherlands, Sweden and the Baltic states.
