---

My current research focuses on several aspects of health policy, bringing my multi-disciplinary training both as an epidemiologist and public health physician and as a sociologist of medicine and public health with expertise not just in quantitative but also qualitative methodologies. I am primarily interested in issues related to social medicine and health inequities (grants # 5,9, 10, 15, 17, articles 69, 71, 82, 84, 94, 96, 98, 101, 103) as well as questions of contested science and public understanding and reactions to public health interventions, such as in environmental health, vaccination policy and resistance to vaccination (grants #1, 3, 4, chapter #2, articles # 17, 48, 52) and alternative medicine (chapter # 1, 2, articles # 16, 44, 53). In addition my research deals with legal and ethical aspects of public health practices (chapters # 7, 9, article #56) and the development of health policy in Israel (chapter #5, articles # 1, 7, 12, 30, 33, 34, 42, 60, 61, 62, 65, 68).

I am involved in several research projects related to health and immigration in Israel (grants #2, 5, 7), both in its historical aspects and related to current policy debates on migrant workers and asylum seekers health (chapter 6, article #19) and the disputes over the ethnic and cultural tensions related to the absorption of mass immigration during the 1950s in Israel – tackling both the issue of holocaust survivors (grant #6, articles #41, 49, 58, 59, 63, 67) and immigrants from Arab countries (chapters # 3, 4, 8, 10 articles # 10, 13, 20, 40, 51, 57).

I am also continuing to work on epidemiological studies, mainly related to infectious diseases, sero-epidemiology, vaccination, health behavior and health promotion (grants # 8-11, articles # 2-5, 8, 9, 11, 14-15, 18, 21-29, 31, 32, 35-39, 43, 45, 46, 50, 54, 55, 64, 66).
