ABOUT

This 10-session course aims to explore how health systems contribute to climate change, with the healthcare sector responsible for nearly 5% of global greenhouse gas emissions.

This course will cover essential topics, including the need to decarbonize healthcare, the effects of climate change on health systems, and examine strategies to protect and support healthcare services and staff and strengthen climate justice. Lectures will be delivered by local and global professionals with expertise in the field. Video recordings will be available for asynchronous viewing.

SESSIONS

- JAN 28: Healthcare Systems in a Changing Climate: Overview and Introduction to the Course
- FEB 4: Methods for Assessing Vulnerability and Adaptation of Health Systems
- FEB 11: Health System Emergency Prevention, Preparedness and Response
- FEB 18: Health and Economic Benefits of Sustainable Health Systems
- FEB 25: Opportunities and Guidance for Lowering the Carbon Footprint of Health Systems
- MAR 11: Health Early Warning Systems and Surveillance in a Changing Climate
- MAR 18: Incorporating Sustainability into Health Technology Assessment
- MAR 25: Measuring, Monitoring and Evaluating Health Systems Resilience
- APR 1: Justice, Governance, Health Systems, and Climate Action
- APR 8: Health Communication and Education in a Changing Climate

**ALL PROFESSIONALS WITH AN INTEREST IN
CLIMATE CHANGE AND HEALTH ARE WELCOME!**
