

Eric Phillip Twomey
ASPHER Fellow on Climate and Health

A dedicated multilingual medical doctor, Europubhealth alumnus and public health professional with diverse experience spanning surgery, internal medicine, neurology, and biomedical research. Proficient in project management and data analysis, with a strong commitment to advancing modern, resilient healthcare systems.

Currently a scientist at the Swiss Tropical and Public Health Institute (SwissTPH) in Basel, Switzerland, focusing on the health impacts of ultrafine particle air pollution within the EU-MARKOPOLO Project. In parallel, serving as the Fellow in Climate and Health at ASPHER's Brussels office, supporting European and global initiatives.

Passionate about Planetary Health, Nutrition, and Climate Justice, with a vision to foster sustainable solutions at the intersection of health and the environment.
